ABOUT THE WORKSHOP

This workshop aims at fathoming the possibility to create an intelligent app-based payment system (electronic currency) for people living in refugee camps. It should be designed to not only stimulate the economy in the camps, but also to feed information back to participants to see their economy emerging and visualize possibilities to create new activities. Options how to create a prototype app will be discussed. To start the workshop, a refugee camp in Vienna and several other initiatives that kick started an economy will be visited.

ABOUT THE COMPLEXITY SCIENCE HUB VIENNA

The objective of CSH is to host, educate, and inspire complex systems scientists who are dedicated to collect, handle, aggregate, and make sense of big data in ways that are directly valuable for science and society. Focus areas include smart cities, innovation dynamics, medical, social, ecological, and economic systems. CSH is a joint initiative of AIT Austrian Institute of Technology, IIASA International Institute for Applied Systems Analysis, Medical University of Vienna, Vienna University of Technology, Graz University of Technology, and Vienna University of Economics and Business.
